

## Welcome to NASA's Drive-In Movie Event!

This event has been approved by AHS, and the most important guideline is to stay in your vehicle with windows and doors closed, unless you are going to the washroom.

### Tickets

To ensure the safety of our guests and volunteers, printed tickets are NOT required for this event. Please provide your name/show your e-ticket to the volunteers at the gate.

### Parking

Volunteer parking attendants in safety vests will direct you to a parking space. As per AHS guidelines, all cars must remain 2 metres from the vehicle next to them (one empty spot between). Please keep your doors and windows closed.

### Washrooms

Four porta-potties are available for use, two on the **main level of the parkade** at the bottom of Stairwell 8 and 9. There are also two elevators near the porta-potties (see map below). If there is a line, please maintain a distance of 2 meters from others.

### Audio

Please tune in to **99.7 FM** to hear the movie!

### Running Lights

Please turn off the daytime running lights on your vehicle, or bring something to cover your headlights.

For most vehicles, the following steps work (but your vehicle may require a different process):

1. Turn vehicle off.
2. Engage the parking brake.
3. Turn vehicle on.

### Movie Start/End Times

The planned starting time is 9:20 PM and the running time is 1 hour and 53 minutes.

### Exiting During or After the Movie

Exit where you entered, using the south parkade ramp. When leaving, please watch out for pedestrians and other vehicles.

**Need a boost after the movie? We've got you covered!  
Flag down one of the parking attendants for help.**
